

The Wiregrass Homeschool Civitan group from Enterprise, Alabama visited the Civitan International Research Center on Tuesday, March 22, 2016 to present 173,351 aluminum can tabs to the Center. The students have been collecting the tabs for over a year. The number of tabs represent $\frac{1}{2}$ the steps it would take to walk from Enterprise to Birmingham. Students plan to continue saving the tabs and return to the Research Center with the remaining "steps."

Congratulations to a great group of kids for their dedication to making a difference in their world!
