	Date:					
	Comment:					

### Important Notes

-This form must accompany all specimens received  
 -Billing information (page 5) must be included  
 Additional information is available online at [www.uab.edu/medicine/genetics/medical-genomics-laboratory](http://www.uab.edu/medicine/genetics/medical-genomics-laboratory)

-All specimens received must include **two** patient identifiers and **collection date**  
 -Testing must be ordered by a qualified clinician

### Test Requisition Form

### Lymphocyte/White Blood Cell-based Comprehensive Testing via Next-Gen Sequencing

☐ **RUSH Analysis:** Testing completed within **15 working days** of receipt of sample  
(Additional **\$600 RUSH fee** applied; only available for tests on this page)

#### NF1/Legius syndrome and Other RASopathy Related Conditions

☐ **NF1-NG:** NGS and Del/Dup: *NF1* only

☐ **NFSP-NG:** NGS and Del/Dup: *NF1* and *SPRED1*

☐ **NNP-NG:** NGS: 17 genes (**no NF1**): *BRAF, CBL, HRAS, KRAS, LZTR1, MAP2K1, MAP2K2, NRAS, PPP1CB, PTPN11, RAF1, RASA2, RIT1, SHOC2, SOS1, SOS2, and SPRED1*; and Del/Dup: *SPRED1* and *LZTR1*

☐ **RAS-NG:** NGS: 18 genes: *BRAF, CBL, HRAS, KRAS, LZTR1, MAP2K1, MAP2K2, NF1, NRAS, PPP1CB, PTPN11, RAF1, RASA2, RIT1, SHOC2, SOS1, SOS2, and SPRED1*; and Del/Dup: *NF1, SPRED1, and LZTR1*

☐ **CST-NG:** NGS: *HRAS* only

#### NF2/Schwannomatosis/Meningiomatosis

☐ **NF2-NG:** NGS and Del/Dup: *NF2* only

☐ **SCH-NG:** NGS: 3 genes: *LZTR1, NF2, and SMARCB1*; and Del/Dup: *NF2, LZTR1, and SMARCB1*

☐ **MEN-NG:** NGS: 4 genes: *NF2, SMARCB1, SMARCE1, and SUFU*; and Del/Dup: *NF2 and SMARCB1*

#### Peripheral Nerve Sheath Tumor Testing

☐ **PNT-NG:** NGS: 6 genes: *NF1, NF2, KRAS, LZTR1, PTPN11* and *SMARCB1*; and Del/Dup: *NF1, NF2, LZTR1, and SMARCB1*

#### McCune-Albright Syndrome

☐ **GNAS-NG:** NGS: *GNAS* exons 8 and 9 only

#### Rhabdoid Tumor Predisposition Syndrome

☐ **RT-NG:** NGS: *SMARCB1* and *SMARCA4*; and Del/Dup: *SMARCB1* only

#### Tuberous Sclerosis Complex

☐ **TSCP-NG:** NGS and Del/Dup: *TSC1* and *TSC2*

#### Capillary Malformation Arteriovenous Malformation Syndrome

☐ **RASA-NG:** NGS: *RASA1* and *EPHB4*; and Del/Dup: *RASA1* only

#### Additional Information

##### Test Description Key:

Next Generation Sequencing (NGS)  
Deletion/Duplication analysis (Del/Dup)

For additional testing options via **tumor/biopsy**, please see **page 3** of this order form.  
Please contact the lab via phone (205) 934-5562 or via email at [medgenomics@uabmc.edu](mailto:medgenomics@uabmc.edu) if you have any questions when completing this form.  
For additional information, visit our website at [www.uab.edu/medicine/genetics/medical-genomics-laboratory](http://www.uab.edu/medicine/genetics/medical-genomics-laboratory)

### Important points of consideration for testing

The average coverage for all of our panels is >1800x. Specifically for the *NF1* gene, the NGS approach covers >98.5% of the *NF1* coding region at ≥350X and 99.9% ≥200X, allowing detection of very low level mosaicism, down to 3-5% variant allele fraction respectively. For all other genes on our panels, the NGS approach covers an average of 99% at ≥200X. Remaining regions are covered at ≥30X. However, for patients with segmental/mosaic presentation, deep coverage in lymphocyte cells may be insufficient to identify the underlying gene change. Testing the affected tissue(s) may be necessary to confirm a diagnosis. Please see page 3 for our tumor/biopsy-based testing options.

Please note: For patients with an ongoing pregnancy who require comprehensive NF1 testing, "NF1-R" is recommended due to the sensitivity and fast turnaround time of this test (please see page 4 for this option).

### Specimen Requirements

#### Accepted Specimens

Specimen requirements vary based on test requested; please see our website for more details.

- Blood:** 3-6ml EDTA (receipt within one week of collection)
- Saliva:** OGR-575 DNA Genotek (kits are provided upon request)
- DNA:** extracted from lymphocyte cells, a minimum of 25ul at 3μg, O.D. value at 260:280nm ≥1.6 (must be extracted in a CLIA or equivalent certified lab)
- Fibroblast cells**

#### Specimen Information:

- ☐ Peripheral Blood (EDTA); # Tubes: \_\_\_\_\_
- ☐ Extracted DNA; Source: \_\_\_\_\_
- ☐ Saliva (kit must be provided by MGL)
- ☐ Other, please describe: \_\_\_\_\_

Please note: failure to provide a date of collection can delay release of results

Sample Collected Date (required): \_\_\_\_\_

Name: (First) (MI) (Last) DOB: (MM/DD/YY)

### Tumor/Biopsy-based Comprehensive Testing

☐ Please check here if blood or DNA is provided for confirmation testing. Blood Collected: (MM/DD/YY)

#### NF1/SPRED1 on biopsied CALs and Neurofibromas

**\*\*Please contact the laboratory at least one week in advance of the biopsy before ordering this test as media must be provided in advance and special shipping instructions apply. Biopsies must arrive *within 60 hours of collection*\*\***

☐ NF14C: Sanger (RNA) and Del/Dup: NF1 (with automatic reflex to SPRED1) on biopsied CALs

☐ NF14N: Sanger (RNA) and Del/Dup: NF1 on biopsied neurofibromas

#### NF2/Schwannomatosis

☐ NF2-NG: Fresh/Frozen Tumor for NGS and Del/Dup: NF2 only

☐ SCH-NG: Fresh/Frozen Tumor for NGS and Del/Dup: LZTR1, NF2, and SMARCB1

☐ NF24: Tumor Block for Sanger and Del/Dup: NF2 only

☐ SCHP: Tumor Block for Sanger and Del/Dup: NF2, LZTR1, and SMARCB1

#### Rhabdoid Tumor Predisposition Syndrome

☐ RT-NG: Fresh/Frozen Tumor for NGS SMARCB1 and SMARCA4; and Del/Dup: SMARCB1 only

☐ SB14RT: Tumor Block for Sanger and Del/Dup: SMARCB1 only

#### RASopathy Related Conditions

☐ NNP-NG: Fresh/Frozen Tumor for NGS (no NF1): BRAF, CBL, HRAS, KRAS, LZTR1, MAP2K1, MAP2K2, NRAS, PPP1CB, PTPN11, RAF1, RASA2, RIT1, SHOC2, SOS1, SOS2, and SPRED1; and Del/Dup: SPRED1 and LZTR1

☐ RAS-NG: Fresh/Frozen Tumor for NGS: BRAF, CBL, HRAS, KRAS, LZTR1, MAP2K1, MAP2K2, NF1, NRAS, PPP1CB, PTPN11, RAF1, RASA2, RIT1, SHOC2, SOS1, SOS2, and SPRED1; and Del/Dup: NF1, SPRED1, and LZTR1

#### Meningiomatosis

☐ MEN-NG: Fresh/Frozen Tumor for NGS: NF2, SMARCB1, SMARCE1, and SUFU; and Del/Dup: NF2 and SMARCB1

#### Peripheral Nerve Sheath Tumor Testing

☐ PNT-NG: Fresh/Frozen Tumor for NGS: NF1, NF2, KRAS, LZTR1, PTPN11 and SMARCB1; and Del/Dup: NF1, NF2, LZTR1, and SMARCB1

#### Tuberous Sclerosis Complex

☐ TSC-NG: Fresh/Frozen Tumor for NGS and Del/Dup: TSC1 and TSC2

### Additional Information

#### Test Description Key:

Next Generation Sequencing (NGS)

Sanger Sequencing (Sanger)

Deletion/Duplication analysis (Del/Dup)

Please contact the lab via phone (205) 934-5562 or via email at [medgenomics@uabmc.edu](mailto:medgenomics@uabmc.edu) if you have any questions when completing this form.  
 For additional information, visit our website at [www.uab.edu/medicine/genetics/medical-genomics-laboratory](http://www.uab.edu/medicine/genetics/medical-genomics-laboratory)

### Important points of consideration for testing

- The MGL offers next generation sequencing testing options that provide the ability to identify variants (indels and substitutions) as low as 3% of the alleles, depending on coverage in the regions of interest.
- NF1/SPRED1 biopsy-based testing is considered the "gold standard" approach for confirming a diagnosis of mosaic/segmental NF1 or Legius Syndrome.
- A minimum of two biopsies is required for NF1 testing. Two or more tumors are suggested for our other testing options. There are no additional fees associated with testing on additional biopsy specimens.
- When proceeding with tumor-based testing for NF2, test code "SCH-NG" or "SCHP" (NF2, SMARCB1, and LZTR1) is suggested unless the patient has additional findings unique to NF2.

### Specimen Requirements

#### Accepted Specimens

Specimen requirements vary based on test requested; please see our website for more details.

-CALs or Neurofibromas: require special media transport (kits are provided upon request, to be arranged at least one week in advance of procedure)

-Fresh/Frozen Tumors: please submit a pathology report; for additional requirements, see tumor submission checklist

-Formalin-Fixed Paraffin-Embedded Tumors (Tumor Block): please submit a pathology report; blocks are preferred to curls, when available; for additional requirements, see tumor submission checklist

#### Specimen Information:

☐ Frozen

☐ Fresh

☐ Paraffin Curls

☐ Paraffin Block

☐ Extracted DNA; Source: \_\_\_\_\_

☐ Biopsy-CAL-spot; # biopsies: \_\_\_\_\_

☐ Biopsy-Neurofibroma; # biopsies: \_\_\_\_\_

**Please note: failure to provide a date of collection can delay release of results**

### Billing

☐ Please hold sample until further notice from the ordering facility.

### Important Information

By completing this form, you **agree** that you have discussed the MGL's billing policies with your patient. Credit card information **MUST** be provided with sample submission for self-pay clients. **Please note:** If you are paying via self-payment or requesting a benefits investigation, there will be a **3-5 working day delay** on the initiation of your test. Requests for **cancellation** of ongoing testing must be submitted to the laboratory **within three working days of specimen arrival**. Individuals or institutions submitting requests after the three working day window may still incur charges for the cost of testing. Full information on the billing policies is available at [www.uab.edu/medicine/genetics/medical-genomics-laboratory](http://www.uab.edu/medicine/genetics/medical-genomics-laboratory)

### ☐ Institutional Bill

☐ Please check box if billing institution should receive report directly

Institution:	PO# (if applicable):
--------------	----------------------

Address:		
----------	--	--

City:	State:	Zip:
-------	--------	------

Contact (Name and Title):	Preferred method of contact: <input type="checkbox"/> Email <input type="checkbox"/> Phone
---------------------------	---

Email:	Phone:	Fax:
--------	--------	------

### ☐ Self-Payment Enclosed

☐ Visa ☐ MasterCard ☐ Discover ☐ American Express

Name as it appears on card:

### ☐ Bill Third Party Insurance Company

Please include a copy of the pre-approval statement or provide the approval number if payment has been pre-authorized in advance of shipment.

**Insurance pre-verification/authorization previously performed?** ☐ Yes ☐ No If yes, approval number is required:

☐ Please check box if you would **not** like insurance pre-verification/authorization to be performed by the MGL.

Please send a **legible copy** of the patient's insurance card, front and back.

ICD-10 Codes (required):

### Important Considerations for Insurance Billing

For a list of contracted insurance companies, please visit our website or call our billing coordinator at 205-934-5523. As insurance prices are not listed, please call the billing coordinator to request a quote, if needed. The MGL will contact the insurance provider to inquire regarding the CPT code coverage for all samples submitted for insurance payment. The healthcare provider will be contacted with the copay/deductible and also in cases where the insurance provider denies coverage of the requested codes or supporting documents are required from the provider to confirm coverage. **This service is not offered for prenatal samples.** **Please note: An insurance verification is not a guarantee of payment. Out of State Medicaid is not accepted under any circumstances. All RUSH fees must be paid up front.** By completing this form, you agree that you have discussed the MGL's billing policies with your patient.

## Informed Consent for Genetic Testing

**\*\*This form does not need to be returned to the Medical Genomics Laboratory if Informed Consent portion of the Test Request form has been signed.\*\***

I hereby consent for:

Name:	DOB:	Gender:
-------	------	---------

To participate in genetic testing for the following RNA/DNA-based cascade of tests ordered by my physician at the University of Alabama at Birmingham (UAB) Medical Genomics Laboratory (MGL):

Genetic Tests:
----------------

I understand that:

1. Any biological samples submitted for genetic testing (e.g., blood, cheek cells, saliva, amniotic fluid, chorionic villi, tumor, and/or tissue) will be removed from me and/or my minor child(ren) using standard techniques which carry their associated risks.

2. Any samples obtained will be used for the purpose of attempting to determine if I and/or members of my family carry genetic changes in the disease genes ordered by my physician.

3. The genetic tests performed at the MGL are the most sensitive developed and are highly specific. However, sensitivity and specificity are test-dependent. Additional testing details and the specific detection rates of each test can be found at [www.genetics.uab.edu/medgenomics](http://www.genetics.uab.edu/medgenomics).

4. The following are possible outcomes for the specific tests listed above:

Positive	Unknown Significance	Negative
This is an indication that I may be predisposed to or have the specific disease, or condition tested. Further testing may be needed to confirm the diagnosis.	There may be a possibility that the laboratory findings will be ambiguous or of unknown significance. This may require additional testing from me or my family members. In rare circumstances, findings may be suggestive of a condition different than the diagnosis that was originally made.	There is a chance that I will still have this genetic condition even though the genetic test results are negative. Due to limitations in technology and incomplete knowledge of genes, some changes in RNA/DNA or protein products that cause disease may not be detected by this test.

5. In other cases, the RNA/DNA test is unable to identify an abnormality although the abnormality may still exist. This event may be due to incomplete knowledge of the gene structure or an inability of current technology to identify certain types of mutations in the gene. When clinically necessary, the MGL may use a method called linkage analysis. This method is not a direct test, but will report the probability that you and/or family members have an inherited disease or disorder. In some families, the markers used in linkage analysis may be uninformative. If so, linkage testing cannot provide results for the family members in question.

6. The RNA/DNA analysis performed by the MGL is specific for the genetic test listed above and in no way guarantees my health or the health of my living or unborn children. The MGL cannot be responsible for an erroneous clinic diagnosis made elsewhere.

7. The tests performed at the MGL are expanded and improved continuously. The tests offered are not considered research but are considered the best and newest laboratory service that can be offered. Genetic testing is complex and utilizes specialized materials so there is always some very small possibility that the test will not work properly or that an error will occur. There is a low error rate (perhaps 1 in 1000 samples) even in the best laboratories. Additionally, in very rare instances, this test may reveal an important genetic change that is not directly related to the clinical reason for ordering this test. This would be considered an incidental finding. The MGL reserves the right to report these incidental findings if they are clinically relevant to the patients and/or their families. In such instances, these results will be discussed with my healthcare provider and additional testing may be recommended. My signature acknowledges my voluntary participation in this test, but in no way releases the laboratory and staff from the MGL from their professional or ethical responsibility to me.

8. The MGL does not return DNA samples to individuals or physicians. While the MGL is not a specimen banking facility, in some cases it may be possible for the laboratory to reanalyze my remaining DNA upon request. The request for additional studies must be ordered by my referring physician/counselor and there will be an additional fee.

9. An aliquot of my DNA/RNA may be used for validation, educational and/or research purposes. For some molecular genetic tests, a synopsis of clinical information and test results may be included in HIPAA-compliant, de-identified public databases as part of the National Institute of Health's effort to improve diagnostic testing and our understanding of the relationships between genetic changes and clinical symptoms. If I would like to opt out of participation, I can contact the MGL via email at [medgenomics@uab.edu](mailto:medgenomics@uab.edu) or calling the laboratory at 205-934-5562.

10. Because of the complexity of genetic testing and the important implications of the test results, results will only be reported to me through a physician, genetic counselor, or a certified genetics professional. The results are confidential to the extent allowed by law. They will only be released to other medical professionals or other parties with my written consent or as otherwise allowed by law. Participation in testing is completely voluntary.

11. **For Prenatal Testing:** If prenatal diagnosis is being performed, fetal cells obtained by chorionic villus sampling or amniocentesis will be used. In order to perform accurate prenatal diagnosis, biological samples are required for the fetus as well as from the affected individual in the family and from the biological mother.

12. I and/or my physician/counselor have signed the informed consent portion of the test order form indicating that we have discussed the items on this document and I will also receive a copy of this consent form.
