“Genomic Contributors to Dementia Risk”
Friday, January 28, 2022
12:00pm

Register for the seminar [HERE](#)

Target Audience: UAB Broader Genetics Community

Disclosures and acknowledgements:

- Nicholas Cochran, PhD has no actual or potential conflict of interest in relation to this program/presentation.
- The following planners, speakers, moderators, and/or panelists of this CE activity have no relevant financial relationships with commercial interests to disclose: Lizhong Wang, PhD; Runhua Liu; PhD.

There is no commercial support for this session

Objectives: After attending this session, participants should be able to understand:

1. Understand the burden of Alzheimer’s and related dementias in the United States
2. Become familiar with how genetics can help us understand Alzheimer’s and related dementias
3. Understand genetic associations with age at disease onset in dominant Alzheimer’s disease
4. Become familiar with gene regulation of MAPT

Sponsored for CME Credit by UAB Division of CME
