

Genetics and Genomics Seminar Series

Mick D. Edmonds, MS, PhD
Assistant Professor
UAB Department of Genetics

“Novel Mechanisms of Oncogenesis and Metastasis”

Friday, May 14, 2021
12:00pm

Register in advance for this meeting:

https://uab.zoom.us/meeting/register/tJYud-uurjwjHtQ7hzQgJ_xd5a8m861GZDHD

Target Audience: UAB Broader Genetics Community

Disclosures and acknowledgements:

- Mick D. Edmonds, MS, PhD has no actual or potential conflict of interest in relation to this program/presentation.
- The following planners, speakers, moderators, and/or panelists of this CE activity have no relevant financial relationships with commercial interests to disclose: Lizhong Wang, PhD; Runhua Liu; PhD

There is no commercial support for this session

Objectives: After attending this session, participants should be able to understand:

1. Understand ncRNA have important roles in cancer progression
2. Identify the tissue specific function of miR-31 in human lung cancer
3. Appreciate that the mechanisms of oncogenesis are unique from metastasis
4. Understand miRNA have tissue specific function

Sponsored for CME Credit by UAB Division of CME

The University of Alabama School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. The University of Alabama School of Medicine designates this Regularly Scheduled Series session for a maximum of 1 *AMA PRA Category 1 Credit(s)*[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity. The University of Alabama School of Medicine is an equal opportunity/affirmative action institution.
