

Genetics and Genomics Seminar Series

Qin Wang, PhD

Professor, Department of Cell, Developmental and Integrative Biology

“Targeting α 2AAR: Solution for Alzheimer’s Disease?”

Friday, December 13th, 2019

12:00pm

Finley Conference Center

Kaul Human Genetics Building, 2nd Floor Courtyard

Target Audience: UAB Broader Genetics Community

There is no commercial support for this session

Objectives: After attending this session, participants should be able to understand:

1. Review general features of Alzheimer’s disease
2. Understand noradrenergic dysfunction in Alzheimer’s disease
3. Recognize novel roles of norepinephrine in promoting Alzheimer’s disease pathogenesis
4. Identify α 2A adrenergic receptor as a therapeutic target for Alzheimer’s disease

Sponsored for CME credit by UAB Division of CME The University of Alabama School of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The University of Alabama School of Medicine designates this Regularly Scheduled series for a maximum of 1 AMA PRA Category 1 Credit. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
