Genetics and Genomics Seminar Series

Xu Feng, PhD
Professor, Department of Pathology

“Selective RANK Signaling Pathways as Novel Drug Targets for Breast Cancer Prevention”

Friday, November 22nd, 2019
12:00pm

Finley Conference Center
Kaul Human Genetics Building, 2nd Floor Courtyard

Target Audience: UAB Broader Genetics Community

There is no commercial support for this session

Objectives: After attending this session, participants should be able to understand:

1. Learn about the diverse biological functions of the RANKL/RANK system
2. Get to know the molecular mechanism of RANK signaling transduction
3. Understand the crucial roles of the RANKL/RANK system in the mammary gland development and breast cancer pathogenesis
4. Appreciate the promising potential of selective RANK signaling pathways to serve as novel drug targets for breast cancer prevention

Sponsored for CME credit by UAB Division of CME The University of Alabama School of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. The University of Alabama School of Medicine designates this Regularly Scheduled series for a maximum of 1 AMA PRA Category 1 Credit. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
