

Postdoctoral Fellowship

Virology/Viral Immunology/Cell Biology

[Yewdell Lab](#), Laboratory of Viral Diseases, NIAID/NIH (Bethesda, MD, USA)

I am recruiting a postdoctoral fellow to study **MHC class I antigen processing and presentation** and/or **influenza A virus immunobiology**, areas in which my group has an extensive publication record. My lab operates within a highly collaborative environment within the NIH intramural program, which comprises hundreds of immunology and virology laboratories situated on a leafy campus near Washington, DC. NIH, and the Laboratory of Viral Diseases in particular, provide an outstanding training environment, and NIH postdoctoral salaries are among the highest in the United States. With a philosophy of giving postdocs as much freedom as possible to explore their own ideas, nearly half of my ~60 postdoctoral mentees have obtained tenure-track academic positions after leaving the lab. If you are interested in joining the fun, please email me at **jjewdell@nih.gov** with your CV and a brief statement of your research interests.
