Molecular investigation into the adhesive surface proteins of the dental caries pathogen *Streptococcus mutans*: Is it possible to inhibit bacterial adhesion?

November 5, 2025

11:45 am–1:00 pm

BBRB 170

The UAB iSB Structural Biology Forum (SBF) brings together specialists and non-specialists in structural biology to promote collaborative structure–function research in diverse disciplines including infectious disease, cancer, immunology, cell biology, drug discovery/design, microbiomics and metabolomics.

Refreshments will be served. For more information, please contact Dr. Kevin Pawlik (iSB@uab.edu)
