Structural Biology Forum

Jack Dunkle, PhD

Assoc. Professor | Department of Chemistry and Biochemistry | University of Alabama

Structure, mechanism and biotechnology applications of the Cas10 CRISPR system

March 4, 2026

11:45 am–1:00 pm

BBRB 170

The UAB *i*SB Structural Biology Forum (SBF) brings together specialists and non-specialists in structural biology to promote collaborative structure–function research in diverse disciplines including infectious disease, cancer, immunology, cell biology, drug discovery/design, microbiomics and metabolomics.

Refreshments will be served. For more information, please contact Dr. Kevin Pawlik (iSB@uab.edu)
