MATCH DAY FACTS

• Match Day occurs on the third Friday of March. In 2017, Match Day hit a record high with 35,969 U.S. and international medical school students and graduates vying for 31,757 residency positions.
• The National Resident Matching Program (NRMP) is a private, nonprofit organization established in 1952 at the request of medical students to provide an orderly and fair mechanism for matching the preferences of applicants for U.S. residency positions with the preferences of residency program directors.
• NRMP Matches use a computerized mathematical algorithm to align the preferences of applicants with the preferences of program directors in order to fill training positions available at U.S. teaching hospitals. Research on the NRMP algorithm was a basis for awarding the 2012 Nobel Prize in Economic Sciences.
• On the Monday prior to Match Day, candidates find out from the NRMP if (but not where) they matched. They must wait until Match Day to learn where they matched.

Top Residency Match Results

- 28 internal medicine
- 24 pediatrics
- 18 general surgery
- 17 emergency medicine
