To Connect via Video Conference (VC) or Phone:
- Download and install free RealPresence video conference software to your computer to connect. This must be installed and tested with IITS at least one day **in advance**. [http://iits.uasystem.ua.edu/RP.html](http://iits.uasystem.ua.edu/RP.html)
- **All desktop participants dial in to the video conference via:** **99900634**
- You may **call into the VC using phone number 205-930-6575** (if you are off-site, or there are internet connection problems with our video conferences)
- If you have connection or technical issues please contact IITS at 205-975-6854

This seminar series is sponsored by:

- UAB Minority Health & Health Disparities Research Center (MHRC)
- Deep South Resource Center for Minority Aging Research (RCMAR)
- UAB Center for Outcomes and Effectiveness Research and Education (COERE)
- UAB Center for Clinical and Translational Science (CCTS)
Research Methods and Secondary Data Analysis (RMSDA) Seminar Series
Secondary Data Analysis & Health Services, Outcomes, and Effectiveness Research Methods Seminars
We record the session and make the PPT available to the audience who attends, as well as those on the distribution list, and those who may view the video on the website later. We connect via video conference to scholars at our partnering institutions which include Alabama State University, Morehouse School of Medicine, Tuskegee University, Jackson State University, Creighton University, the University of Alabama, and others.

Secondary Data Analysis (SDA) Seminars
Leaders: Rob Weech-Maldonado, PhD, MBA, and Ann Smith, MPH
Meets for an overview of secondary data sets available for analysis
Goals:
- Present an overview of the dataset and its data elements
- Provide examples of research questions that can be addressed with dataset
- Include participation of junior investigators that have used data (if possible)
- Discuss protocol for access to data and resources for data management/analysis

Health Services, Outcomes, and Effectiveness Research (HSOER) Methods Seminars
Leaders: Michael Mugavero, MD, MHSc, and Ryan Outman, MS
Meets to review HSR/OER methods in current research projects, grants, and/or publications
Goals:
- Present work with detail on research methods that may be applied to other areas of research
- Focus on scientific methods with attention for potential cross-pollination in terms of application/adaptation of methods and/or new collaboration
- Discuss research methods and tools with potential for wider implementation. How can x technology or approach that has been used to successful study disease y in z setting translate or be applied to study another disease in another setting.

This seminar series is sponsored by the:
