- The purpose of the **UAB MHRC Health Disparities Seminar Series** is to provide a variety of health disparities topics that are current and relevant to junior and senior investigators, as well as students, and other researchers at UAB and partnering institutions. We seek topics that provide new knowledge and cutting-edge research results.
- Objectives are to increase knowledge and awareness of health disparities research, foster collaborations and elicit new ideas for health disparities research proposals, and to encourage and facilitate the formation of manuscript writing.
