

Immunology Post-doctoral Positions

NEW postdoctoral positions are now open in the research group of Dr. Hui Hu. The research projects aim to develop infectious disease and autoimmune disease models and study the molecular mechanisms underlying novel transcriptional networks in both T cell and B cell differentiation (Nat Immunol 7:819 (2006), Nat Immunol 12:544(2011), Nat Immunol (2014)),

The postdoctoral candidates will have recently acquired a Ph.D. and/or M.D. preferably in immunology with technique expertise in flow cytometry and molecular biology. Strong background in either T cells or B cells, transcriptional regulation and/or signaling pathways is desirable. Candidates should be highly self-motivated and career oriented.

To apply, please submit your curriculum vitae and cover letter including names and contact information of three references to, Hui Hu, Ph.D., Associate Professor, Department of Microbiology, UAB School of Medicine, **E-mail: Immhulab@gmail.com**

<http://www.uab.edu/medicine/microbiology/faculty/primary>

As a Top 20 research university UAB has outstanding research facilities and infrastructure. The Department of Microbiology is one of the top NIH-funded departments of its kind in the USA <http://www.microbio.uab.edu/>.
