Assistant Professor - Cancer Immunology - The Children's Hospital of Philadelphia

The Children's Hospital of Philadelphia and the Department of Pathology and Laboratory Medicine at the Perelman School of Medicine at the University of Pennsylvania seek candidates for an Assistant Professor position in the tenure track. The successful applicant will have experience in the field of Immunobiology and/or immunotherapy. Responsibilities include teaching and mentoring of graduate students and medical students as an integral component of this position. Applicants must have an M.D. and/or Ph.D degree and have demonstrated excellent qualifications in education and research.

The Children's Hospital of Philadelphia (CHOP) shares a contiguous campus with the Perelman School of Medicine at the University of Pennsylvania, and CHOP faculty hold academic appointments at Penn. A major initiative at both institutions promotes novel strategies for understanding, preventing, and treating cancer and immune-mediated diseases, including the use of genetically modified T cell and checkpoint immunotherapies. More broadly, we seek individuals who utilize innovative, state-of-the-art experimental and computational approaches to understand basic and/or translational aspects of hematological malignancies, immune responses to tumors, cancer immuno-editing, immunosuppressive pathways and immunotherapy for cancer. The environment for collaborative research at CHOP, the Center for Childhood Cancer Research, the Institute for Immunology at the University of Pennsylvania and across Departments, Schools, and Centers on the CHOP/Penn campus is outstanding. Existing strengths of the Department include B- and T-cell receptor signaling, chimeric antigen receptors, DNA damage and recombination in immune cells, hematopoietic stem cells and immunogenomics. The successful applicant must have a clear record of productivity and ingenuity during their post-doctoral training, and high likelihood of securing extramural funding.

A generous recruitment package and lab space at CHOP, as well as excellent institutional and core research resources will be provided.

We seek candidates who embrace and reflect diversity in the broadest sense.

The University of Pennsylvania and The Children’s Hospital of Philadelphia are EOEs. Minorities/Women/Individuals with disabilities/Protected Veterans are encouraged to apply.
