UNIVERSITÉ DE MONTRÉAL
FACULTÉ DE MÉDECINE
INVESTIGATORS, HUMAN MICROBIOME

The Faculty of Medicine of Université de Montréal (UdeM; http://medecine.umontreal.ca/) and the Research Center of CHU Sainte-Justine (https://recherche.chusj.org/) (Montréal, Québec, Canada) are seeking applications for 3 (three) Investigators in Microbiome research with a background in Nutrition and/or Bacteriology. These recruitments are in line with the strategic priorities of the Faculty of Medicine and its partners to expand the critical mass and develop a strong, university-wide multidisciplinary network of experts on the microbiome. Depending on their expertise, the recruits will be affiliated with an appropriate Department at the Faculty such as Microbiology, Infectiology and Immunology or Nutrition.

We are seeking 1 (one) mid-career nutritionist or microbiologist with expertise in the human gastrointestinal microbiome. The primary responsibilities of this faculty member will be to establish and maintain an independent, original, innovative and internationally recognized translational research program with a focus on the human gastrointestinal microbiome and health. We are also seeking 2 (two) early-career (junior) research scientists with expertise in the human microbiome and/or microbial communities. We are looking for a nutritionist or microbiologist (bacteriologist) and we are particularly interested in candidates with expertise in bacterial metabolism. Experience in «omics» approaches and/or translational research is of interest for all candidates.

Teaching responsibilities may include general nutrition and microbiology according to the area(s) of expertise of the successful candidate(s). The ideal candidates must hold a Ph.D. and/or M.D. degree in the appropriate discipline as well as relevant post-doctoral experience, a record of research productivity, and a potential to secure extramural research funding.

The Faculty of Medicine of UdeM and CHU Sainte-Justine offer competitive salary and recruitment packages commensurate with experience and qualifications, an innovative research environment, state-of-the-art facilities and competitive graduate training programs. The selected candidates will be considered for a Canada Research Chair (CRC) and/or a Canada Foundation for Innovation (CFI) Leaders fund.

Applicants are invited to submit their curriculum vitae, a statement of research goals and objectives, and teaching interests and experience, and the names and address of three professional references. The language of teaching at the Université de Montréal is French; language training is offered to non-French speakers who will be required to be sufficiently proficient to teach in French after a period of three years.

Starting Date: Open.

Send applications and other correspondence concerning these positions to:

Christian Baron, Vice-Dean of Research and Development

Confidentiality
The Université de Montréal application process allows all regular professors in the Department to have access to all documents unless the applicant explicitly states in her or his cover letter that access to the application should be limited to the selection committee. This restriction on accessibility will be lifted if the applicant is invited for an interview.

Employment Equity Program
The Université de Montréal upholds the principles of employment equity and welcomes applications from women, ethnic and visible minorities, aboriginals and people with disabilities. Applicants who belong to one of these groups are asked to complete the employment equity identification questionnaire posted at www.fas.umontreal.ca/affaires-professorales/documents/quest-acces-emploi-EN.pdf and attach it to their application.

Immigration Requirements
In compliance with Canadian immigration requirements, priority shall be given to Canadian citizens and permanent residents.
