

**T32 DK007545**  
**NIH - NRSA TRAINING GRANT RESEARCH FELLOWSHIP**  
**INTERDISCIPLINARY TRAINING IN KIDNEY-RELATED**  
**RESEARCH**

Earliest available start date – July 1, 2019  
(3-4 post-doctoral positions available)

NIH-funded training grant post-doctoral fellowships are available for research training in the areas broadly related to kidney diseases. Trainees will pursue a one to two-year research program in the laboratory of an established basic or clinical research mentor, supplemented with training in advanced biostatistics and bioethics courses.

Trainees will be required to carry out an independent research project in the laboratory of a faculty mentor - a basic scientist or clinician investigator experienced in kidney disease-related research at UAB. Current areas of research interest include renal transport physiology, acute and chronic kidney disease, diabetic kidney disease, cell and developmental biology pertaining to the kidney, polycystic kidney disease, hypertension, glomerular diseases, dialysis-related vascular access, basic and clinical research in transplantation and outcomes/epidemiology research.

Selection of trainees is based on the demonstrated ability of the candidate and his/her career choice and potential for an academic career. Applicants must be United States citizens or permanent residents and have completed their MD or PhD. Interested applicants are encouraged to submit a CV, mentor statement and biosketch, two letters of recommendation, and a personal statement detailing their career interests. Please submit all documents as a single PDF file via email to Kelly Andringa, e-mail address: [kellyandringa@uabmc.edu](mailto:kellyandringa@uabmc.edu)

UAB is an equal opportunity employer and applications from qualified under-represented minorities and women are strongly encouraged.

**SUPPORT:** Includes stipend, benefits, tuition, travel funds, and appointment in the School of Medicine as a Post-Doctoral Trainee.
