UAB AnyConnect VPN Installation – Windows
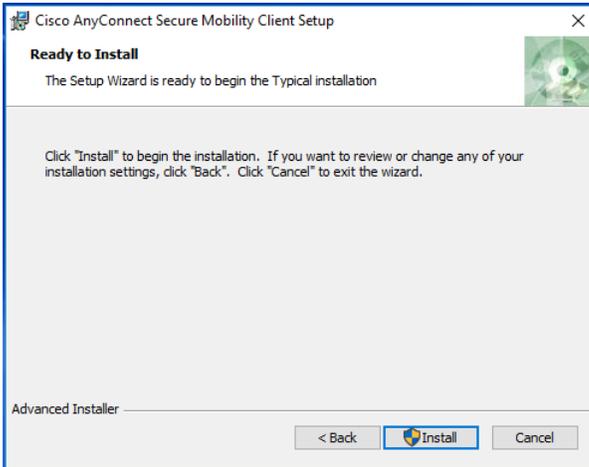

1. Download the Windows Client from https://www.uab.edu/vpn

2. Double click on the downloaded file to open the folder. There will be two files in the download.

   Double click on the AnyConnect msi file.

3. The following screen will appear. Click "Next" to begin the installation.

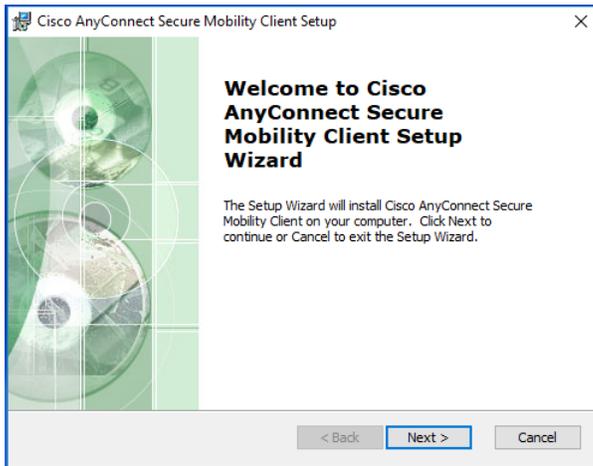

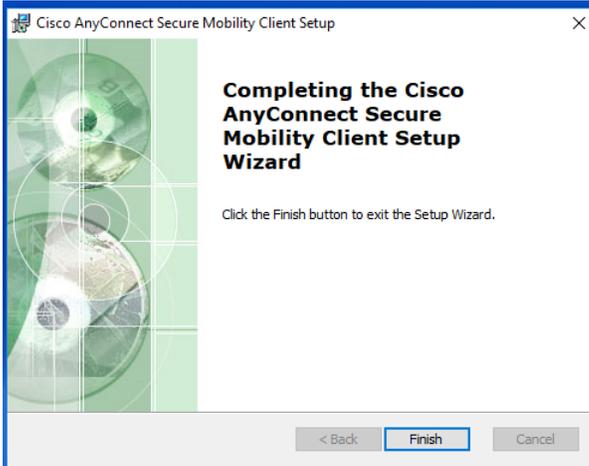

4. Accept the license agreement and click "Next"
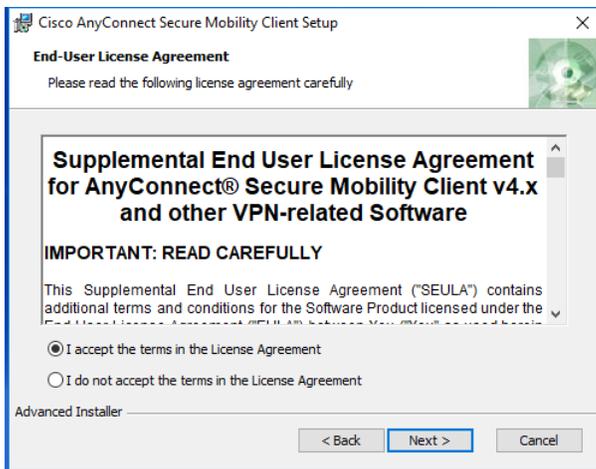

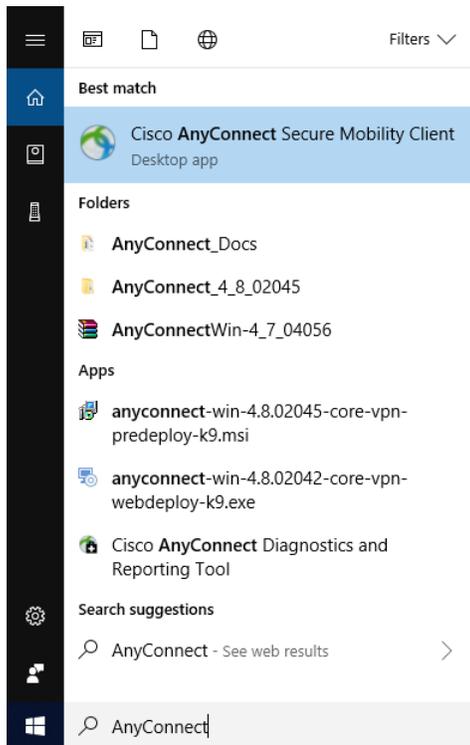

5. Click "Install"

6. Follow all prompts and click "Finish" to complete the install.
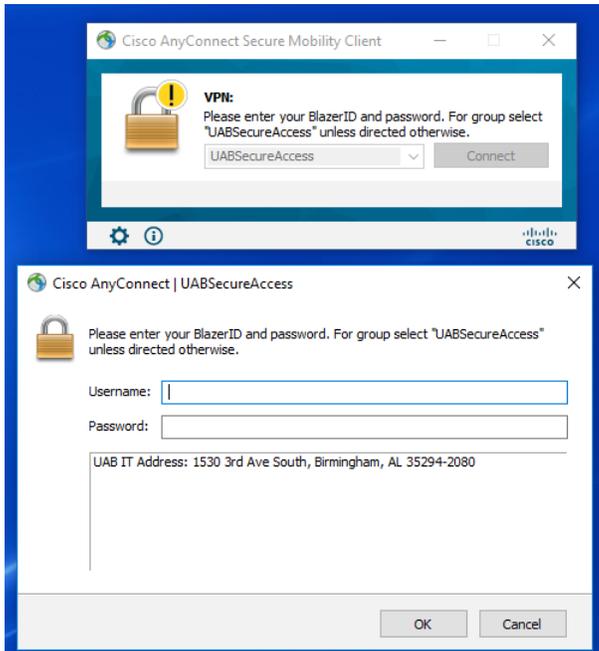

Using the AnyConnect Client

1. Locate the AnyConnect Client in the program list and double click to start the application.

2. The installation process should have installed the "UABSecureAccess" profile. Click on the

   "Connect" button and enter your Blazer ID and password in the appropriate fields.

   Please note: If you do not see the entry "UABSecureAccess" in the dropdown box (or if you have

   been told to use another group by your administrator), type "vpndpo.dpo.uab.edu" and click the

   "Connect" button. Select the appropriate group from the list. This should place the needed

   profile in the client for future connections.

3. To disconnect from the VPN, locate the icon in your system tray and double click.
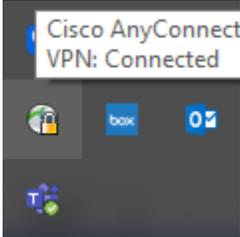

4. Click the "Disconnect" button to terminate the session.
