UAB Pancreatobiliary Disease Center

UAB Medicine has a new center designed to provide cutting edge care for diseases of the pancreas and bile duct by bringing together a team of physicians with expertise in this complex area. Our multidisciplinary approach within the UAB Pancreatobiliary Disease Center ensures patients with these complex benign or malignant problems will be offered appropriate and modern treatment, in an expedited fashion, all done in conjunction with their local providers. Our team includes surgeons, diagnostic and interventional radiologists, medical and radiation oncologists, advanced gastroenterologists, critical care intensivists, nurses, genetic counselors and other specialists who utilize the most advanced technology to diagnose and manage pancreatobiliary disorders.

Our model involves a thorough initial assessment of each case, followed by same-day testing and/or intervention if necessary. Through our collaborative efforts, we implement personalized treatment plans that best fit the needs of our patients. Patients with malignancies will be offered tumor sequencing and access to clinical trials.

Supported by the resources of the UAB School of Medicine and the Department of Surgery, the UAB Pancreatobiliary Disease Center offers the following:

- Multidisciplinary review of every complex pancreas or bile duct patient referred to our program.
- Treatment of pancreatic cancers, pancreatic cysts, pancreatitis, bile duct and gallbladder cancers, bile duct injuries and complex benign disease of the bile duct.
- A personalized treatment plan with the latest therapies and standards of care based on the patient’s specific type of disorder and outcome goals.
- Access to innovative minimally invasive surgical, endoscopic and radiologic techniques.
- Access to integrative medicine and supportive therapy.
- Comprehensive care in collaboration with the patient’s primary care provider and referring physician.

Our Team

Surgery
Devin Eckhoff, MD
Stephen Gray, MD
Martin J. Heslin, MD, MSHA
Sushanth Reddy, MD
J. Bart Rose, MD, MAS
Selwyn M. Vickers, MD
Jared White, MD

Gastroenterology
Ali Ahmed, MD
Kondal Kyanam, MD
C. Mel Wilcox, MD

Diagnostic Radiology
Desiree Morgan, MD

Interventional Radiology
Andrew J. Gunn, MD
Ahmed Kamel, MD

Medical Oncology
Olumide Gbolahan, MD
Ravikumar Paluri, MD
Grant Williams, MD

Radiation Oncology
Rojymon Jacob, MD
Andrew McDonald, MD

Pathology
Sameer Al Diffalha, MD
Issam Eltoum, MD
Jessica Tracht, MD

Genetics
Meagan Farmer, MS CGC

Critical Care
Sam Windham, MD

For Referring Physicians
Our faculty is committed to providing immediate consultations and care for your patients.
For physician-to-physician consultations, or to refer your patient, call 833-UAB-4PDC (833-822-4732).
