

Procedures for Chemical Spills Flowchart

The Official Chemical Spill Response Protocol

Unfortunately, chemical spills are a part of laboratory life. However, by following these procedures, you can protect your health and others working with you. Follow these procedures every time a spill occurs for everyone's safety. Post this in your lab where spills occur most often. Have any questions or concerns? Please contact UAB OH&S at (205) 934-2487.
