

**HTORR**  
Human Tissues and Organs  
for Research Resource

# Pilot Award Program

## AWARD INFORMATION

The **Pilot Award Program (PAP)** is a 2-year award that provides investigators with up to 10 human biospecimens to be used in a pilot study. The program is part of the The Human Tissues and Organs for Research Resource (HTORR), an NIH funded program within the National Disease Research Interchange (NDRI). **The award includes:**

10 biological samples from any body system

All costs including tissue preservation reagents and shipping costs

Letter of support and budget justification help for **required** subsequent NIH grant application(s)

Technical support for tissue procurement protocol design

### PAP FOCUS AREAS\*

#### NIAID

Infectious Diseases  
Immunologic Diseases  
Allergic Diseases

#### NIDDK

Diabetes  
Digestive Diseases  
Kidney Diseases

#### NEI

Retinal and Corneal Diseases  
Lens and Cataract Research  
Glaucoma and Optic Neuropathies

#### NIAMS

Arthritis and Rheumatic Diseases  
Musculoskeletal Diseases  
Skin Diseases

#### NHLBI

Blood Disorders  
Lung Diseases  
Heart and Vascular Diseases  
Obesity, Nutrition, and Physical Activity

#### ORIP

Resource-related Research  
Spanning Multiple NIH Institutes

**\*Only applicants whose work aligns with the specified NIH institutes and offices will be reviewed.**

800-222-NDRI (6374)

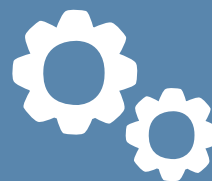

grants@ndriresource.org

## Eligibility

Eligible individuals must hold a faculty position and meet **one** of these high priority areas:

Early-stage investigators that are within 10 years of a terminal degree or completion of residency

Established investigators that are transitioning to using human biospecimens

## Key Dates

### Spring Cycle

### Fall Cycle

Applications Open

January 1

June 1

Last Day to Submit Requested Tissue Information Form

April 15

September 15

Applications Due

May 1

October 1

Award Decisions Announced

July

December

Award Start Date

August

January
