

This evaluation is to be completed by the supervisor and then reviewed with the student. Please consult the definitions for progress goals, feedback types, and level (novice to mastery) and evaluate the student with all of these in mind. Please mark N/A if the student did not have an opportunity to perform that role.

**Progress Goals by Rotation**

End of R1= **Advanced beginner** (roles are completed with some instructional feedback)

End of R2= **Approaching competent** (roles are completed with decreasing instructional and increasing constructive feedback)

End of R3= **Competent** (roles are completed with minimal instructive and significant constructive feedback)

End of R4= **Approaching proficient** (roles are completed with no instructive and decreasing constructive feedback)

End of R5= **Proficient or above** (roles are completed with some constructive and some stylistic feedback)

**Feedback Definitions:**

**Instructional Feedback=student did not attempt or complete a task when expected. Supervisor needs to correct inaccuracies within student's work.**

Examples: Student did not know they needed to create a differential diagnosis as part of case prep, so the supervisor needed to tell them to do it next time. Student identified indication-specific resources to give to a client, but it was not written in lay language. Student provided inaccurate or incomplete information to a client. Student inaccurately determined patient recurrence risk. Student incorrectly accessed a client's psychosocial needs.

**Constructive Feedback=student's work no longer has inaccuracies. Supervisor provides more effective ways of organizing and delivering information or accomplishing skills.**

Examples: Student accurately described the phenotype of a syndrome, but the order in which they presented the information either needed to be different or more attuned to the client's immediate needs. Student recognized a psychosocial opportunity and attempted psychosocial counseling strategies, but a different strategy would have been more appropriate. Student creates visual aids that are factually correct but are overly complicated and need to be simplified.

**Stylistic Feedback=student is functioning independently, all work is accurate, and delivery and organization is effective. Supervisor suggests alternatives to fine tune or enhance the student's skills, professional development, and reflective practice.**

Examples: Student did a nice job educating a client, but they could consider trying different visual aids to see what effect it may have on client understanding. Student appropriately met the psychosocial needs of a distressed client using reflections and empathy statements, but they could consider using different psychosocial skills in this situation in future such as advanced empathy or confrontation.

**Pre-Session Counseling Roles**

\*A performance level of **PROFICIENT** is the end goal for student progress while in the program.
