# UAB Genetic Counseling Program Clinical Training Video

## Remediation

# OUTLINE

---

1. What constitutes remediation of a clinical rotation
2. Student notification of remediation
3. Supervisor notification of remediation
4. Types of remediation
5. Remediation outcomes

# Remediation

- Grades for graduate students at UAB are A, B, C, or F
- Students are required to make an A or a B in GC courses and rotations
- Students who make below a B require remediation
- Students who make below a B during rotations could have:
  - Large deficits in one area
  - Small deficits in multiple areas
- As a reminder:
  - We cover grading in a separate video
  - Supervisors do not assign grades

# Notification of Remediation

## STUDENT

- After the supervisor's final evaluation
- The PROGRAM notifies the student
- Meet with UAB program directors to discuss remediation plan

## SUPERVISOR

- Current supervisor will not be notified
- PRIMARY supervisor for the student's next rotation will be notified by the program
- Meet with UAB program director(s) to discuss

# Types of Remediation

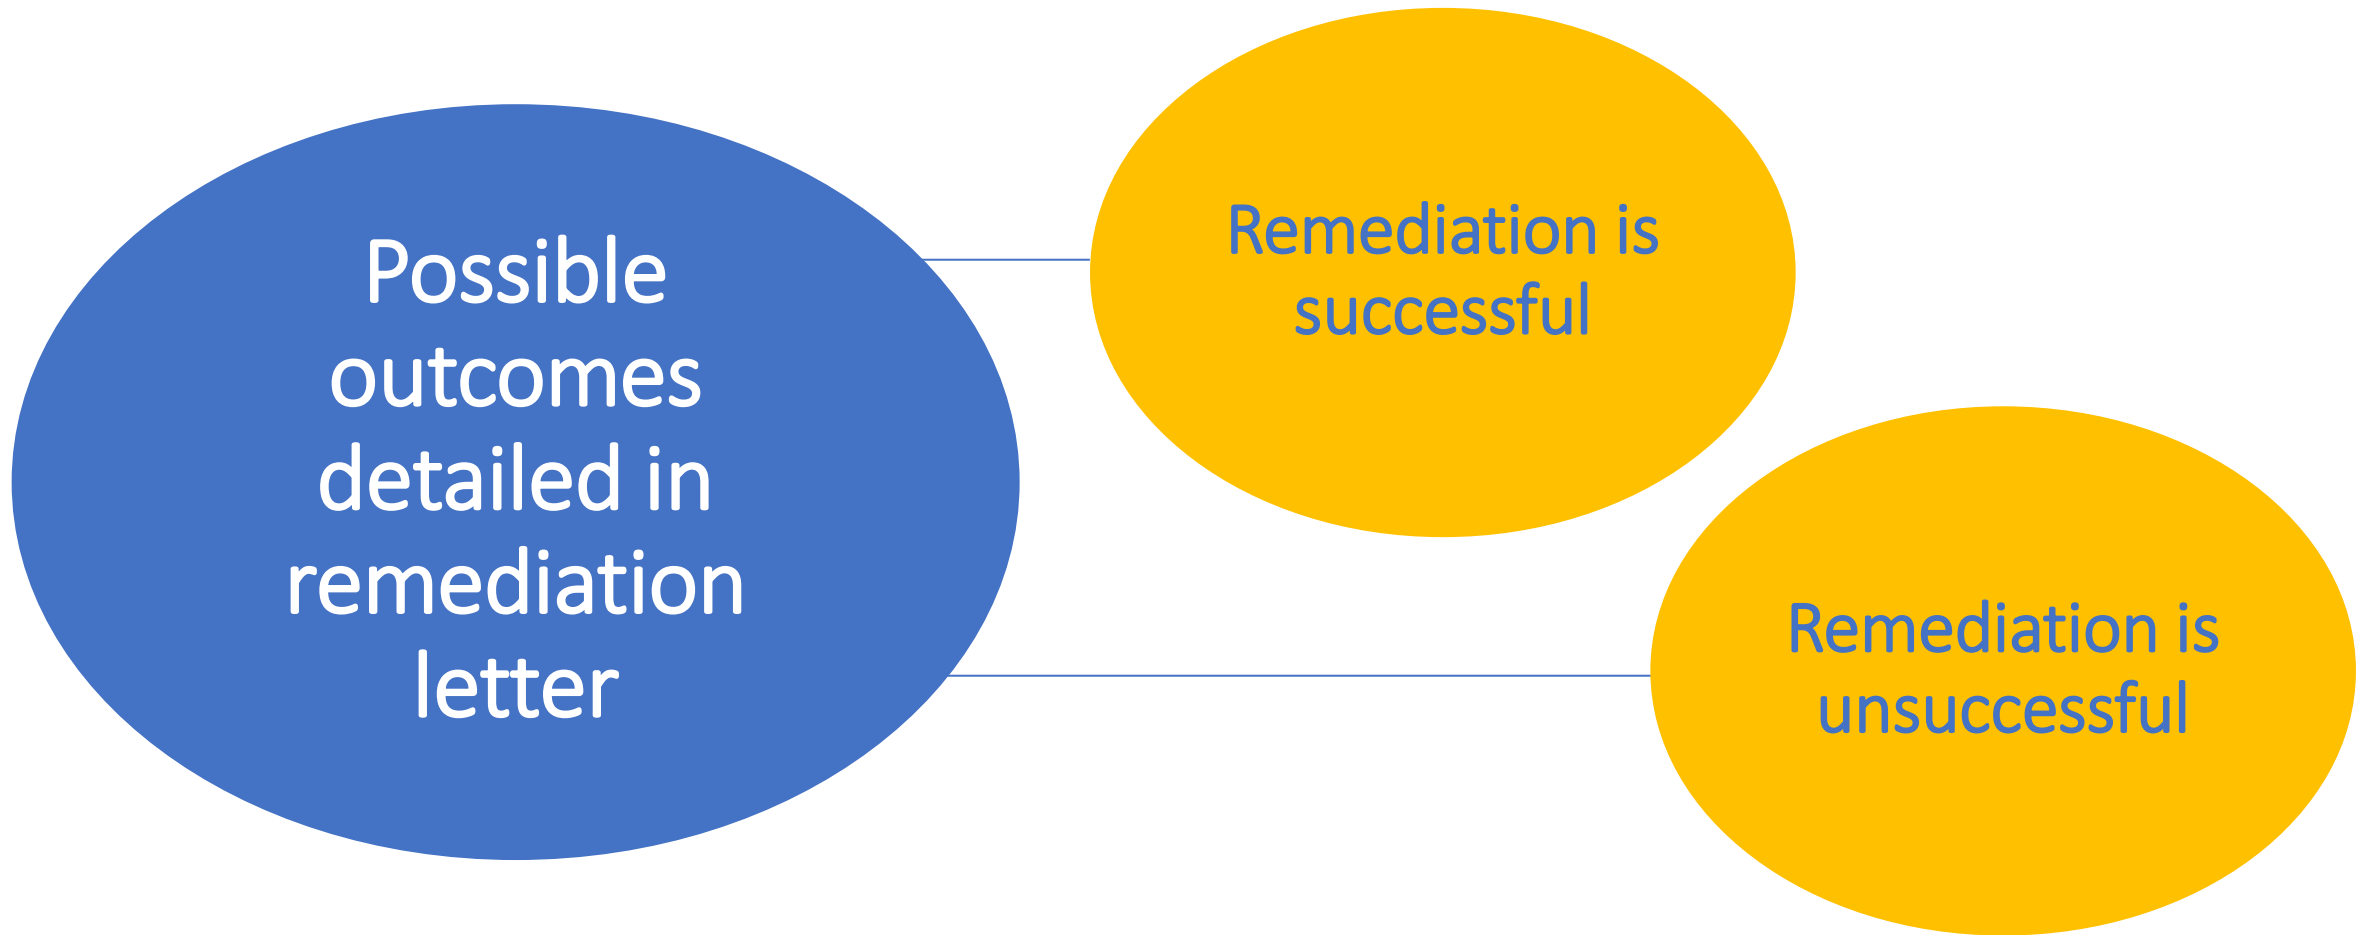

- If a student receives a C and deficits are concentrated in one or two areas
  - Assignments/projects/extra cases
  - Continue to next rotation

- If a student receives a C and deficits are widespread
  - Assignments/projects/extra cases
  - Repeat the rotation type
    - Dependent on student's schedule and deficits

- If a student receives an F and deficits are widespread
  - Program could decide to dismiss the student

- If a student receives a F and deficits are concentrated in one or two areas
  - Assignments/projects
  - Student must redo the rotation
  - Will receive an F on transcript, can replace with new grade
  - Could delay graduation

# Remediation Outcomes
