School of Health Professions – Shared Governance – Comments on Solutions

• Need to hire someone to develop a Shared Governance communications platform that makes it 'intuitive' for providing input on issues and where it fits into a workday, but is not overbearing.

• Need multiple forms of communication since too many people avoid meetings or don’t like to speak in public.

• Need a ‘rules-based’ structure to ensure that Shared Governance issues have a level of consistency across departments and the school.

• Need more open forums for discussing important Shared Governance issues, but is balanced and moderated to avoid overwhelming faculty/staff with more meetings.
