Tuesday Tip

Something's Phishy

Phishing emails (the ones that are attempting to steal your information) can be hard to spot. Others might be obvious. When in doubt, do these three things:

#1 Check for spelling and/or grammatical errors. If you find some, proceed with caution.

#2 Before you click on a link in an email, hover over the link. A box will pop up over the link that will show you the web address. If it looks phishy, proceed to step #3.

#3 Report any potential phishing emails by clicking on the **PhishMe** button located in your email toolbar (yes, instead of emailing Marcie Willis). Click OK to confirm and a report will automatically be submitted to AskIT. You will receive an additional email notification once your case has been resolved.

Don't have the PhishMe Reporter? Follow [these](#) instructions to download it. You can also forward any suspicious looking emails to abuse@uab.edu.

For more information, please contact the [IDS team](#).
