Session 1: *New and Emerging Medical and Rehabilitation Interventions for Diabetic Eye Disease*
Yolanda Cate

Objectives:
1. Describe the roles and responsibilities of occupational therapy practitioners and other providers in facilitating and delivering diabetes care across a continuum of clinical and community based settings.
3. Review the current Medicare coverage for diabetes self-care management and supplies.

Session 2: *Best Smartphone and Tablet Apps and Features for Vision Impairment from Age-Related Eye Disease and Brain Injury*
Shane Jackson

Objectives:
1. Identify apps for smartphones and tablets that assist adults with vision impairment from age related eye disease and brain injury to complete daily occupations.
2. Identify features on smartphones and tablets that enable adults with vision impairment from age-related eye disease and brain injury to use these devices more efficiently to complete daily occupations.
3. Select the appropriate app for to meet a client’s specific occupational needs.

Session 3: *How to Understand and Accurately Interpret Microperimetry and other Field Reports*
Lei Liu

Objectives:
1. Describe the components of perimetry and strategies used to assess the visual field in persons with vision impairment from age-related eye disease and brain injury.
2. Describe and interpret the different elements of a field report generated with microperimetry and the Humphrey computerized field analyzer.
3. Relate the visual field deficit depicted on a field report with the client’s limitations in reading and mobility.

Session 4: Conditions that Complicate Low Vision Rehabilitation: Vision Impairment from Parkinsons Disease and Dry Eye
Allison Treleaven, Halie Cottrill and Tatevik Movsisyan

Objectives:
1. Identify visual changes that may occur from Parkinsons disease and dry eye and their affect on reading and other daily occupations.

2. Describe the medical assessments and interventions used to assess and improve vision for patients with Parkinsons Disease and dry eye.

Session 5: What Medicare has in Store for Low Vision Rehabilitation
Deann Bayerl

1. Describe the trajectory of CMS payment systems for 2017-2020 their impact on low vision practice.

2. Identify ICD-10 updates (and proposed updates) that are relevant to low vision practice.

3. Diagram the new occupational therapy evaluation codes and apply them to low vision case scenarios.

4. Discuss available information on additional OT procedure code updates.

Session 6: Updates from UAB Research in Vision Rehabilitation
Mary Warren and Beth Barstow

1. Describe research initiatives being conducted within the OT department and UAB that will impact occupational therapy practice in low vision.
