2. @ MANIKINS

- Start when prompted by the computer
- Listen to manikin for feedback and use it to modify your compressions and ventilations
- Use the headphones to hear the activity feedback
- End the assessment when prompted by the computer
- ACLS uses the Adult manikin only

Adult/Infant Specifics

- With the correct sized bag-valve mask, ventilate at 1 breath every 5-6 seconds for **Adults** and 1 breath every 2-3 seconds for **Infants**
- Use proper head-tilt chin lift to open the airway
- Create and maintain a good seal around mouth and nose with the bag-valve mask face mask
- Deliver each ventilation over a period of a second, refrain from over inflating the manikin lungs by squeezing the bag all the way
- Look for manikin chest rise to ensure of an open airway and proper ventilation seal
- Compression must be at least **2 inches for Adults** and **1 ½ inches for Infants** at a rate for 100- 120 compressions per minute

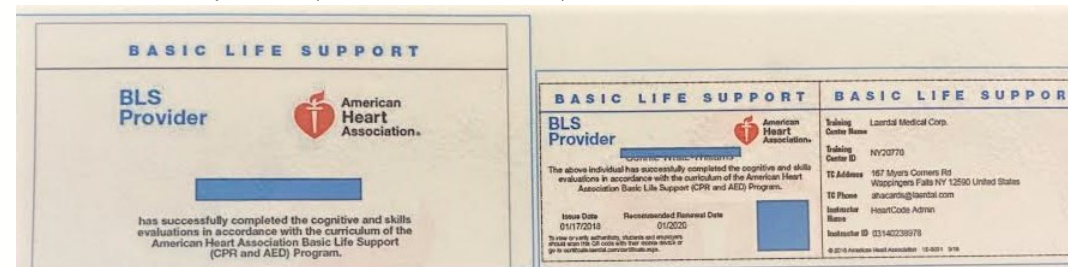

3. AFTER YOU ARE DONE
