Simulation Articles - March 2015

   Prospective cohort study using standardized patient simulation in pastoral education

   Review article on incorporating simulation into pediatric medical education

   Using simulation to help prepare medical staff for incorporating electronic medical records

4. Retention of advanced cardiac life support knowledge and skills following high-fidelity mannequin simulation training - http://www.ncbi.nlm.nih.gov/pubmed/25741028
   Pharmacy students retention of ACLS training 120 days after initial simulation based exposure

5. “I wouldn’t get that feedback from anywhere else’: learning partnerships and the use of high school students as simulated patients to enhance medical students’ communication skills - http://www.ncbi.nlm.nih.gov/pubmed/25779410
   This article evaluates whether the use of high school students as simulated patients who provide formative feedback enhances the capacity of medical students in their fifth year of training to initiate screening conversations and communicate effectively with adolescents about sensitive health issues.

   This article looks at the effect of high- versus low-frequency expert feedback on the learning curve of procedural learning.
