Performance Evaluation

**PURPOSE:** The departments that report to Student Affairs strongly feel it is important to provide student employees with constructive feedback to enhance their work performance and professional development. The evaluation is a tool to objectively measure an employee’s performance. This document is a written record of the employee’s job performance and should be used to facilitate communication between the supervisor and the employee. The evaluation process should be used to motivate an employee and to identify the area(s) of employee strength and those that need improvement.

**INSTRUCTIONS:** The student employee should be given a blank evaluation form to complete and submit to their direct supervisor before the scheduled performance evaluation. Using the following rating scale, identify the rating that best describes the employee’s performance for each performance factor in the space provided. Both the employee and supervisor’s evaluations should be used during the performance evaluation. The bullets listed under each category reflect examples but are not all inclusive of how a student can be evaluated in each area.
