All employees of Student Health Services are required to sign the UAB Student Health Confidentiality Statement and complete HIPAA training upon initial employee and every year thereafter. The UAB Student Health and Wellness Confidentiality Statement is designed to ensure that all patient/client information is maintained in the strictest possible level of confidentiality. An employee’s signature on the statement certifies their acknowledgment and understanding of their responsibilities to protect that confidentiality. All patient/client information is confidential, to include but not limited to the following: records for medical, counselling, billing, and scheduling, as well as patient/client status and information discussed or disclosed during care.

Student Health Services and Student Counseling Services functions in an integrated care model. This allows providers to work collaboratively to offer the best care for patients and clients of the UAB Student Health and Wellness Center. Each patient is prompted to sign a Consent Form which explains the level of care and collaboration that occurs during the process of care. If you have questions concerning our integrated care model or the consent form, please email us at studenthealth@uab.edu or you can speak with someone regarding this at your next visit. For questions pertaining to Student Counseling Services, please send those to counseling@uab.edu.
