

Student COVID-19 Entry Checklist

UAB is prioritizing the health and safety of all students as we unite on campus.

As you make plans to come to campus, here is a checklist of what you have to do to safely enter UAB's campus.

- GuideSafe™ Testing:** Each student will be required to take a free COVID-19 entry test before coming to campus. [Click here to learn more.](#)

- Online Training:** Students will be required to complete campus entry training via Canvas. An email will be sent to your UAB email with a link to the training courses.

- Complete UAB Healthcheck:** A required COVID-19 assessment tool for employees and students to report the existence of any current COVID-19-related symptoms, exposure history, and testing history. You may begin using Healthcheck now. [Click here to learn more.](#)

- GuideSafe™ Exposure Notification App:** The GuideSafe™ Exposure Notification App facilitates anonymous self-reporting and automates alerts to individuals with previous proximity or close contact with a later positive COVID-19 person. More information will be sent to your UAB email address.

- Participate in Sentinel Testing:** We are adopting sentinel testing across the full campus, both academic and medical. Random testing of a percentage of our population on a weekly basis will provide a snapshot of how much of the COVID-19 virus is circulating across our campus. We hope that you will help us in the fight against the virus so that we can continue to put measures in place to keep you safe. [Click here to learn more.](#)
