Subject: Do NOT ignore ONE Password expiration notice

Dear DOPM folks with @uabmc.edu email accounts --

If you get an email like this...

....please do **NOT** ignore it. It's about your email password.

Instead, follow the customized instructions we wrote for you here:
http://www.uab.edu/medicine/dopm/help/set-up-email-outlook/changing-your-email-password or call
us at 934-7662 (when you have a few moments) and we can walk you through it.

The rest of the below is more info about that only if interested:

HSIS is the group that provides and maintains @uabmc.edu email accounts.
HSIS is sending these emails out because they have a new policy that these passwords need to change periodically.

So if you ignore these emails, **your @uabmc email will become disabled** -- which is definitely a problem ☹
So don't ignore them.

Note: This new policy is being implemented in phases, so not all DOPM people can do this yet, but if you got that ONE
Password expiration notice email from them, then you can.

If any questions, concerns, or problems, please let us know.

Thanks,
~ Lisa
