

# Jumping up to the Top of a webpage

Brought to you by Adim Premani  
- HelpDesk Computer Tech  
(in MT-403)

## SITUATION:

I'm browsing a lengthy webpage and need to jump back to the top of it.

## SOLUTION:

Most keyboards have a built-in solution to this problem:

*Home* will jump you back to the top of a page.

Also:

*End* will jump you to the bottom.

*Pg Up* and *Pg Down* will let you scroll in smaller increments on the page.

These keys are most likely to be located above your directional arrow keys.
