QUESTION:

On other computers I've used (like at home), I have my image (not just a generic outline of a person) when I login. Can I do that for my work computer too?

ANSWER:

Yes you can.

Change your local account picture in Windows 10

1. Select the **Start** button, then select **Settings** > **Accounts** > **Your info**.
2. Under **Create your picture**, select **Browse for one**. Or, if your device has a camera, select **Camera** and take a selfie.

Other options/resources:
