## Shake your phone to “undo”

### SITUATION:

When I use my smart phone, sometime I will accidentally do something (like delete text) that I didn't mean to.

Is there an “undo” feature on my phone that I just don't know about it?

---

### SOLUTION:

Yes....

When you goof, just shake your phone a few times, and it will give you an “undo” option.

Note: Your results may vary; this may not work all the time with all phones in all situations.
