Subject: Computer Tip of the Week -- How to Undo an Undo

How to Undo an Undo

This is an **encore** Tip of the Week.
Re-sending it because it's potentially so useful to so many.

Brought to you by **Lisa**

- HelpDesk Triage and Computer Tech
(now in MT-403)

SITUATION:

Oops, I accidentally did an “Undo” (Ctrl + Z). How do I reverse that?

In other words, can I Undo an Undo?

SOLUTION:

Yes.

Most folks are familiar with Ctrl + Z to undo something you just did.

But what if you do that; and then you realized that you shouldn't have done that?

Simple: Just Ctrl + Y to “undo the undo”

Was this helpful? Do you have suggestions for a future Tip of the Week? Do you have any other comments?
